It's amazing what you can accomplish with the power of technology these days. It's hard to believe that I run a million dollar business with a few software applications that automate mostly all of the grunt work for me.

I've seen a lot of "so-called" marketers talk about living the internet lifestyle where they only work 30 minutes a day and make six figures a month.

The truth is... there working their tails off just to make that kind of money. I mean 12 hour days just so that they can make money in their sleep!

I know firsthand because I've visited a few of them in their offices, thinking it was going to be all fun and games...

I was sadly mistaken, they we're working harder than most people with a 9 to 5.

After 3 years in the marketing game...

I knew that the "internet lifestyle" was possible.

So I set out to create a software program that would almost eliminate all the hard-work that most "so-called" gurus have to do just to make ends meet.

So after months of testing and talking about with programmers found a solution that would put all my "traffic-getting" techniques on autopilot.

I absolutely hate working long hours and sitting in front of a computer... that's NOT how life was suppose to be.

Each morning when I wake up I check the numbers on each of businesses... here are yesterday's stats from just one of my affiliate accounts...

It's kind of hard to have a bad day when affiliate commissions are being forced into your Clickbank account.

...And no, those are not earnings from a famous guru launch I did... those are REAL affiliate commissions I get from selling other peoples products.

To make that kind of income you have to be implementing the RIGHT strategies and using software to automate those strategies!

...And since you're reading this report, I'm going to assume that you would like to learn how to build that kind of income on autopilot also.

After reading this report you will finally see what it takes to earn a true "auto-pilot" income.

As cheesy as that may sound... it's a reality for me and soon it will be for you too.

Now let's get down to business...

Let me start off by telling what I do NOT do and why you shouldn't do any of things either! To make that kind of money, I do NOT (and will NOT) do any of the following:

PPC – placing ads on Google or any search engine for that matter is the oldest game in the book and not to mention it's the most expensive.

Google Adwords used to be the "go to" source for traffic... now their focus is more on BIG companies with BIG budgets, not the Average Joe... like you and I.

These days you can expect to pay anywhere from \$2 to \$30 per click... seriously.

It's hard to make a profit when you're paying that much for advertising.

SEO – finding the right keywords can be a little complicated and building backlinks is super boring! Then you have to check frantically to see if you're ranking yet.

One of my marketing buddies is a SEO genius and he says he normally doesn't get good rankings on a site until a year later. Who has a year to wait on a site to rank?

Then you have to pull out the SEO dictionary and learn terms like Latent Semantic Indexing, Google Dance, Anchor Text, Meta Data, No Follow, Do Follow and a bunch of other terms I don't care to mention.

PPV – This seems to be the latest hot "trend" from the gurus. They all tell you you can buy dirty cheap traffic from PPV networks and show your affiliates offers to the rest of the world for pennies. Now, I have to admit, this seems to be the ultimate affiliate marketer dream. And I've fallen for it.

The reality is that, although the gurus tell you that you can show direct affiliate offers to people for just a few pennies and that is true, what they "gladly" forget to mention is that the traffic they send you over is total junk and hence it does NOT convert into sales!

Mobile Marketing – This is an even newer "can't fail method". And people tend to fall for this a lot. Again it all sounds really good, mobile PPC is way cheaper than normal PPC, so you will indeed get traffic to your offer for pennies but once again, what they gladly forget to mention is that the traffic converts so badly as very few people buy products from their mobile devices that you don't stand a chance to make decent profits from your campaigns!

Social Bookmarking – this is another tactic that became ineffective a month after it was discovered... these days, it's a waste of time.

Article Writing – Submitting an article to an article directory with a million other articles won't get noticed.

Then you have to write articles that don't directly promote a product... then some article directories don't allow you to put your affiliate link in the bio anymore.

This is one technique that got saturated really fast!

Facebook – this has been beaten to death! When you have a bunch of gurus launching products about Facebook alone, the market tends to get saturated... meaning expensive & ineffective!

Media Buys – when was the last time you clicked on a banner? Unless you have a nice size budget this won't return any measurable results.

Or any other traffic methods that marketers have hyped up to make it seem like it's the next best traffic source!

GURU SECRET #1: Most gurus' release their traffic-generating techniques months after they discovered it, because they don't want to create any new competition!

Think about it... why would somebody sell you information that makes them millions every year for only \$37?

What I did use is my 'most coveted' traffic software to create income generating sites with little to no effort.

You see, there are only a few traffic techniques that actually WORK and will continue to work as long as the internet is alive!

When I discovered which techniques worked I created a software program that automates them, so I don't have to repeat these same steps every time I setup a website.

I am 98.97% sure that you have never seen anything like this before because a few my colleagues and myself are the only ones using it.

Before you continuing reading this report I want you forget everything you've heard about internet marketing and generating targeted traffic to your site.

Act as if all of this is new to you, because if you've been in the IM game for any length of time you will notice giving you false promises.

This can really cloud your thoughts and prevent you from seeing OPPORTUNITY when it's right in your face.

It took me months of figuring out what different processes can be automated and which ones can't.

I keep adding new automated features and took away the ones that brought me NO results so that I could an application that consistent only the things I needed.

So every time I make suggestions to my developers the software best better and better!

In other words... making money gets a whole **LOT easier** with each update.

When I first started online I didn't think any of this was possible and that automated income was just a **MYTH!**

I'm sure you've been thinking the same thing... I've been in your shoes, I don't think anyone was born making money online... it's something you have to work towards with "trial and error".

I've probably tried everything under the sun when it comes to making money from home.

Everything from MLM, biz opps, real estate, eBay, I even bought a ton of infomercials that promised me millions!

Here's what I learned after I spending nearly 2 years and close to \$50K on different products, seminars and even coaching programs.

GURU SECRET #2: None of these so-called 'make money' opportunities were intended for you to make any money... if you got any kind of measurable results from their information they wouldn't continue selling it for long.

Now, who has 2 years and \$50,000 to plot down and start putting different techniques to the test?

You may have a family depending on you or you probably thought your financial situation would be a lot better by now.

Either case... you don't have time to waste on things that **MIGHT** work!

When I first started out, all I wanted to do was make more money.

I didn't want to learn how to do "magic tricks" in order to start generating traffic and making decent money.

You need something that's solid; traffic techniques that have been working for years and that will remain evergreen!

When you have a good source of "evergreen" traffic, meaning techniques that work TODAY and will continue to work as long as the internet is alive, you can create a small monopoly in just about any online venture you go after.

On top of that you don't want to spend eternity getting this traffic because you would dread doing it every time you launch a site, which **CAN'T** be good for business.

Now more about my 'most coveted' software application...

Software and different web applications are the backbone to many Fortune 500 companies.

They use software to manage their customers with CRM (customer relationship management) software... heck, Wal-Mart controls all of their stock based upon their robust software program... imagine them not having it?

Now there's software to get traffic to any site you choose... I'm talking targeted "credit card in hand" traffic.

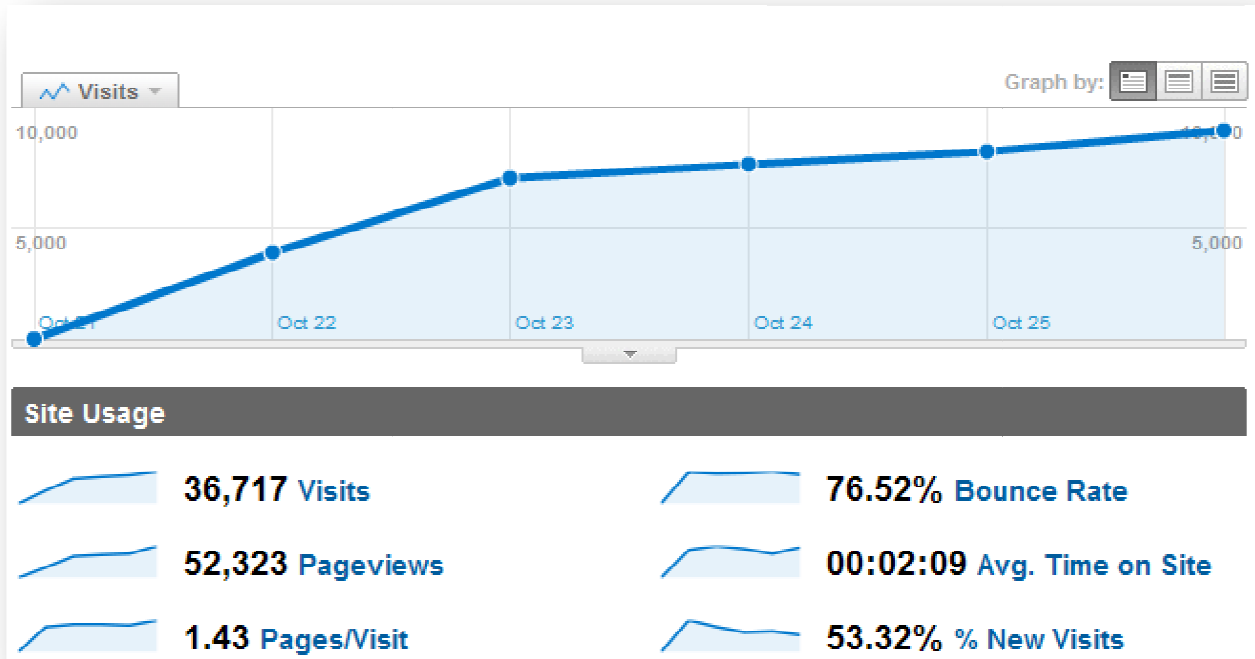

This is serious stuff...

You have to think like a fortune 500 companies in order to run this business successfully.

So here's what I came up with to automate my MOST effective traffic generation techniques.

After inputting the site I want to promote and making a few clicks within the software I create a swarm of traffic...

This website went from zero traffic to over 10,000 unique visitors within one week:

Pretty cool stuff uh?

As you can see it's not a "one-hit wonder" like a lot of stuff you see out there...

This is the real deal...

Now here's the kicker, you ready for it?

I generated all that traffic without mind-numbing SEO, pointless blogging, boring linkbuilding campaigns, ineffective social networking, daunting article writing or expensive PPC...

These are all the methods that the "so-called" gurus will tell you works!

I'm not going to bust you're chops... I'm going to give it to you straight! I know a lot of marketers are probably mad at me right now but phony screenshots and ineffective methods are a thing of the past!

Here are the traffic results from another campaign just so you know that this is serious stuff!

As you seen previously, I can take a completely new site from completely zero traffic to over 10,000 unique visitors within a week.

All it takes is about 10 minutes to install the software, then spend a few minutes making configurations and then you simply plugin the site you want to promote and you'll have...

INSTANT TRAFFIC!!

Imagine being able to setup a website and not worry about how you're going to market it.

You simply plug it into the software and you're done.

I wanted to make application so easy to use that ANYONE could do it. That way there is no guess work whatsoever and you don't have the anxiety of having to figure out what's your next move.

It's already laid out for you!

It sounds crazy... I know, but I've showed you undeniable proof of what is possible with this software.

Now, let's look at how much money that kind of traffic makes me!

In the past three months alone in just ONE ClickBank account, I've earned over \$250,000. This is money I've made as an affiliate, not selling a "get rich quick" product to people or pushing the latest product launch from a slick marketer.

Found 10,594 items, displaying 1 - 100. Total (all results): \$259,528.74

Actions	Date	Time	Receipt	TID	Pmt	Currency	Txn Type	ID
---------	------	------	---------	-----	-----	----------	----------	----

That's over \$259,528 on complete autopilot!! And I have several accounts!

I've been in the game a while and I've tested a lot of traffic techniques but nothing easier than this.

This is because I plugged all my most effective traffic strategies into the software to automate it.

NOTE: This software works in ANY niche, on any product or service. You can send traffic to ANY website you like!

<u>2010-10-27</u>	\$23,452.18

You will finally STOP:

- Chasing the latest guru launch
- Dropping your hard earned cash on PPC ads
- Dealing with complicated SEO jargon

...And you will AVOID:

- Wasting time on methods that don't work

- Having to figure difficult systems and techniques
- The frustration of spending time & money with NO results

I made this software so super EASY use, brain dead SIMPLE to start using right out of the box and POWERFUL to bring in solid results!

Use Auto Traffic Monopoly to do ALL the hard work for you.

Would you have rather make a few bucks working your tail off OR use automated software, that takes less than 10 minutes to setup and can bring in results like this.

The choice is yours...

Spend long hours in front of the computer with difficult traffic techniques and out dated methods or use the Auto Traffic Monopoly software to force a buck load of 100% FREE traffic to any site you choose at the push of a button.

I hope you enjoyed this report, I wish you all the best in your online business and looking forward to have you as one of the few elite members who are going to have the opportunity to profits from my ATM software...

To your success

Andrew Wallace
